

Financial Services Appropriations Requests

The following requests are Idaho-related projects supported and sponsored by Senators Crapo and Risch:

Project Name: Boise State University for a research and economic development and entrepreneurial initiative

Amount Requested: \$200,000

Recipient: Boise State University

Location: Boise

Description: To match private and public sector dollars and in-kind contributions to conduct collaborative research that creates intellectual property, creates jobs, and ultimately leads to the benefit and growth of the Idaho business community.

Public Interest: To assist businesses in promoting entrepreneurial initiative and conduct collaborative research that creates jobs, benefits the Idaho business community, and strengthens the overall economy of Idaho.

Project Name: Idaho Rural Aviation Airmail Delivery and Community Safety Protection

Amount Requested: \$0

Recipient: Central Idaho

Location: Central Idaho

Description: To develop the capability to perform research and testing of the effects of directed energy attacks on U.S. banking and financial infrastructure systems.

Public Interest: To help develop the capability to detect and protect against disruption, damage, or cyber-security compromise from energy attacks on the domestic financial sector.

Project Name: Impact of Directed Energy Attacks on Banking and Financial Infrastructures at the Idaho National Laboratory

Amount Requested: \$1,000,000

Recipient: Idaho National Laboratory

Location: Idaho Falls

Description: To develop the capability to perform research and testing of the effects of directed energy attacks on U.S. banking and financial infrastructure systems.

Public Interest: To help develop the capability to detect and protect against disruption, damage, or cyber-security compromise from energy attacks on the domestic financial sector.

Project Name: Proof of Concept Center/Idaho TechConnect, Inc

Amount Requested: \$1,750,000

Recipient: Idaho TechConnect

Location: Nampa

Description: For the development and operation of a Proof of Concept center that will focus on “maturing” ideas to market ready products and services that could be used to start new companies or licensed to existing companies.

Public Interest: To provide wide-ranging assistance to developing businesses for job creation and business success.
